

We are home brewers. We are
technical experts. We are designers.
We are all of these things in one.

We are **EINBREW.**

Brewing beer can be as complex or as simple as you want it to be, **EINBREW** allows the novice brewer to achieve fantastic results 'out of the box' for all-grain brewing, and it allows the experienced brewer to develop and implement their unique recipes, with precision control to create repeatability and produce great beer time after time.

EINBREW is a result of years of brewing experience, listening to experts and novices, and looking at competitor systems. Now we have a developed a first class product with many innovative and unique features to make your brew day shorter, safer and more repeatable, but importantly, with just as much fun and input as you want. **EINBREW** is one of a kind.

Some of the unique features are:

Handheld controller, program, control and monitor from your armchair.

Controller stores your recipes, memory of 10 user definable all-grain recipes.

Audible process stage alarms, allowing you to move around more freely and not forget the wort!

EINBREW is complex on the inside and simple on the outside, both technical and simple.

The quality of wort is dependent on precise temperature and flow control. **EINBREW** has a unique control system that will keep the wort you produce consistent leaving you cool and calm.

Central upwards forced infusion, helping to maximise the extraction of sugars from the grain, no sparging needed.

Pump during boil cycle, ensuring there is a flow of wort over the heating element to reduce the risk of scorching.

Integral cooler, allows wort cooling to be done quickly and covered, reducing infection risks.

Hop bag/basket part of the circuit, maximising the extraction of the hop flavours.

EINBREW is designed to make brewing safe and easy. So it's easy to lift, easy to drain, and easy to clean.

Cooled wort is pumped out, fast and sanitary wort transfer to fermenter.

Automatic cleaning cycle, no more scrubbing, let **EINBREW** clean itself.

Striking Ergonomic design, **EINBREW** is designed to look great and be easily lifted and moved.

How **EINBREW** compares to the competition:

Feature	EINBREW 30L	SPEIDEL BRAUMEISTER 20L	GRAINFATHER
Maximum Wort Volume	30L (7 us gal)	23L (5.5 US gal)	23L (5.5 US gal)
Max Grain Bill	9Kg	6kg	9kg
Circulate when boiling	Yes	No	No
Wort Pumped out	Yes	No	Yes
Tap	No (not needed, wort pumped out)	Yes (and it blocks with hops)	No
Audible stage alarms	Yes	Yes	No
Audible cooling alarm	Yes	No	No
Programmable Recipes	Yes	Yes	Yes (only with connect)
Microprocessor Control	Yes	Yes	Yes (only with connect)
Controller position	Flexible, handheld.	Poor, under tap.	Poor, fixed to vessel.
Hop filtering	Yes	None	No
Integral cooler	Yes	Yes (optional)	No
Automatic Cleaning Cycle	Yes	No	No
Ergonomic Design	Yes	No	No
Limited Lifetime Warranty	Yes	No	No

All major internal parts, pump, heat exchanger, heating element are widely available, allowing users to replace parts or upgrade their systems locally.

EINBREW is design-led. It's reliable.
It's beautiful. And it's entirely practical.

IT'S THE ONE
